Our main goal is to become the worlds leading automation solution provider where our products deliver exceptional performance, quality & versatility for advanced automotive applications using advanced technologies and approach.

AUTO DIALER

- @ *Dials Multiple Phone Numbers to deliver Alert Message.*
- @ *External Trigger, Contineous Trigger & Power ON facilities.*
- @ *Used with a Standard Phone Equipment.*

Burglary is probably the most preventable of crimes. Installing a security alarm system can reduce your chances of being a victim. For the past ten years **Honey Teq Automations** has supplied successful State-of-the art, User friendly security Equipments for various public & private sectors.

The Auto Dialer provides cost effective monitoring and control of various security conditions in Industries, Office, Banks and residential locations. When an alarm notification occurs the unit will automatically dial user programmed telephone numbers to deliver specific pre recorded message. The Auto Dialer can “guard” your home. or office 24 hours a day, seven days a week. Upto fifty phone numbers are automatically dialed and your pre-recorded message (upto sixty seconds long) is played. You could program it to call your neighbors, the police or your cell phone locally or to any number in the world.

The product works with any standard dial up public telephone line. Features include simple operation (can be installed by anyone in minutes). The unit is field programmable by thy user using a keypad provided in the control panel of the unit. It can be almost activated any type of Sensor or alarm voltage. Upon detection of an alarm the Auto Dialer 7.2 automatically calls a list of preprogrammed phone numbers. A special call progress function allows the unit to make calls until it gets an acknowledgment.

Key Features:
